

Post-doctoral position in Garmy-Susini's Lab

A postdoctoral position funded for 18 months with an option to renew is available in the team "Molecular regulations of (lymph)angiogenic growth factors in vascular diseases" of the Institute of Metabolic and Cardiovascular Diseases of Toulouse (team Lymphactor, I2MC/INSERM U1297) directed by Dr Barbara GARMY-SUSINI. The candidate will determine the effect of non-coding RNAs in the lymphatic system using an original model of conditional KO mice.
